

UK Gender Pay Gap Report

Lead Forensics' gender pay gap is influenced by the technology sector in which it operates and as a result, many applicants for senior roles in the business are received from males. This increases the average male pay at the company compared to average female pay.

Lead Forensics is committed to equal opportunities and conducts interviews with suitable candidates irrespective of gender. The company offers equal pay regardless of gender, and is confident that the basic salaries and variable pay rates offered for equivalent roles are identical for males and females.

UK pay and bonus gap

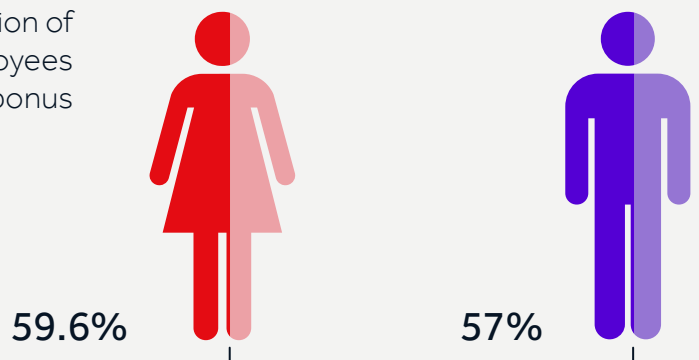

Basic

Mean 19.2%
Median 21.5%

Bonus

Mean 68.1%
